Travelers may find out that the beautiful 5-star hotel they booked online just looks good from outside but not inside. This is what marketers or marketing companies can do to use misleading advertisements in order to sell their products and services.</p> <p>Consumers may wonder how marketers can take something unattractive and turn it to something as amazing as they see in the advertisement. It is not just food that looks different from how it looks in the ad. Basically, anything can be made to look better with camera tricks and Photoshop, a computer program that allows users to make changes to a digital image. Moreover, behind those cool photos, it is a skilled and creative photographer that plays a key role in finishing the photo image.</p> <p>Marketers have their way of telling a story to sell their products or services. 試題內容 (含選項)	<p>The spread of COVID-19 has led to the closure of schools around the world and resulted in the rise in popularity of video conferencing in virtual classrooms. However, some people may feel concerned about the quality issues and challenges of the shift to the online environment.</p> <p>Some believe that video conferencing is a powerful and flexible tool to meet educational goals more efficiently than before. Given the wide selection of options offered by online learning systems, teachers can prepare suitable online resources and create an appropriate e-learning environment to suit the needs of different types of learners, i.e., visual, audio, solo, or interactive learners. In addition, video conferencing can improve student attendance because it allows students to attend classes from any location of their choice, therefore lowering their chances of missing classes.</p> <p>Others argue that teaching via video conferencing is not as simple as just seating students in front of a webcam. Students might be easily distracted by any surrounding social media and fail to concentrate on their screens when taking online lessons. Technical problems such as hardware failure, network connection issues, and software bugs can interrupt the flow of online classes or make it difficult for students to catch up with their virtual classmates. Another problem is the lack of human interaction usually provided by face-to-face classroom settings. This minimal interaction between students and teachers in online instruction often leads to a sense of isolation among students.</p> <p>Video conferencing in education certainly has both advantages and disadvantages. Learning about its negative effects and reducing them are thus very important to help teachers and students benefit from the digital world during the COVID-19 pandemic.</p> <p>According to the passage, which of the following is considered a negative effect of online learning?</p> <p>(A) Camera shyness. (B) Technical difficulties. (C) Active solo performance. (D) Constant human interaction.</p>
公告答案	B

Learning about its negative effects and reducing them are thus very important to help teachers and students benefit from the digital world …，意即了解並降低其負面效應是有助於數位學習的，文章的第三段羅列了數位學習的負面效應，其中一點乃是 technical problems，第 48 題的題幹問的是，「根據文章，下列何者為線上學習的負面效應」，因此，選項(B) technical problems 為正解。</p> <p>3. 故本題最適當答案為(B)。</p>
