The 3D printer is a machine that can create three-dimensional solid objects. In the printing process, the printer adds layers upon layers of materials until a solid object is completed. 25, 3D printers only made small, simple plastic objects. But now, 3D printer technology can help house builders know the exact amount of materials they need even before they start construction. Therefore, building 3D printed homes requires fewer resources and produces 26 waste than the traditional way.

The 3D printer can improve the quality of the objects they create by using artificial intelligence (AI). One of the most exciting applications of AI in 3D printing 27 generative design. Generative design is a computer-aided design technique that uses AI to improve the design process. It helps create lighter and stronger structures. This is because AI can find the best way to reduce the weight of a structure 28 increasing its strength. In this way, better buildings can be created.

25. (A) Finally (B) Soon (C) At first (D) In summary
26. (A) last (B) less (C) least (D) little
27. (A) is (B) are (C) has (D) have
28. (A) nor (B) since (C) unless (D) while

IV. 閱讀測驗：以下有五篇短文，共有 14 個題目，為第 29 至 42 題，請於閱讀短文後，選出最適當的答案。

After the 2022 Asian Games, Minhua, Yating, and Fuhao are motivated to join the University Student Sports Clubs. Answer the questions based on the poster below.

CLUB	HOW TO PLAY	PRACTICE TIME
Badminton	Two or four people hit a shuttlecock over a high net.	Evening on Fridays
Basketball	Two teams score points by throwing a large ball through an open net.	Evening on Tuesdays and Saturdays
Cycling	An individual rides a bicycle.	Morning on Thursdays
Rugby	Two teams score points by carrying an oval ball across a particular line.	Evening on Saturdays
Swimming	An individual moves through water by moving the body.	Evening on Mondays
Weightlifting	An individual lifts heavy objects as a sport.	Evening on Tuesdays and Fridays

31. Minhua and Yating are interested in playing a team sport, which clubs are they likely to join?
- (A) Basketball and weightlifting (B) Badminton and cycling
(C) Swimming and badminton (D) Rugby and basketball
32. Fuhao works in the evening on Mondays and Tuesdays. Which clubs is he likely to join?
- (A) Badminton, Cycling, Rugby (B) Basketball, Swimming, Weightlifting
(C) Rugby, Weightlifting, Swimming (D) Cycling, Basketball, Badminton

Lina is planning a trip and comparing two hotels in a tourist spot. Answer the questions based on the information below.

The image shows a browser window with the address bar containing 'http://www.hotelcomparison.com'. The main content is a table comparing two hotels: Cruise Hotel and Universe Hotel. The table has four rows: Facilities, Services, Distance from tourist attractions, and Room rates. Each row lists specific details for both hotels.

	<i>Cruise Hotel</i>	<i>Universe Hotel</i>
Facilities	Fitness center Indoor car parking Restaurants	Business center Outdoor pool Gift shop
Services	Free airport shuttle Laundry service Free Wi-Fi	24-hour room service Free Wi-Fi Car rental service
Distance from tourist attractions	Sunset Beach (1 km) Theme Park (6 km) Art Museum (8 km)	Art Museum (2 km) Theme Park (16 km) Sunset Beach (20 km)
Room rates	Single: NT\$ 2,700 Double: NT\$ 3,600 Triple: NT\$ 5,200	Single: NT\$ 1,800 Double: NT\$ 2,400 Triple: NT\$ 3,500

33. Which facility or service is provided by both hotels?
(A) Outdoor pool (B) Business center (C) Free Wi-Fi (D) Laundry service
34. How far does Lina have to drive to the Theme Park if she stays in the hotel closer to it?
(A) 2 km (B) 6 km (C) 8 km (D) 16 km
35. Which of the following is true?
(A) If Lina likes to use the fitness center, she should choose Universe Hotel.
(B) If Lina likes to swim in the pool, she should choose Universe Hotel.
(C) Lina will have to pay NT\$ 1,800 for a single room in Cruise Hotel.
(D) Lina is able to use room service anytime in Cruise Hotel.

Jensen Huang (黃仁勳) is the chief executive of NVIDIA, a leading company that makes chips used in artificial intelligence (AI). In 2023, Huang was listed among the 100 most influential people in AI. An inspiration to many, Huang encourages young people to seize the opportunities that AI will present. Meanwhile, he reminds them to take a positive attitude towards challenges.

In a speech to university graduates in Taiwan last year, Huang shared two important lessons he has learned in the past three decades. The first lesson is not to be discouraged by failure. In 1996, his company nearly closed down due to rapid changes in the industry. They soon realized that they had made a mistake, and Huang humbly asked a major customer for help. With the customer's support, the company moved on to invent the chip that led to their future success. Huang's advice is to always honestly face your mistakes and seek help.

The second lesson is to keep going despite difficulties. In 2007, the company made an expensive investment on product improvements. The new products were not selling well for many years until they started being used for machine learning. The experience taught Huang and his colleagues to handle the pain and suffering needed to achieve their vision. Their continued efforts help build NVIDIA into a global leader in AI technologies.

Huang's life story is also about **pushing oneself to do better**. Born in Taiwan, Huang moved to the United States at the age of nine. He later earned two engineering degrees before working for two chip companies. In 1993, on his 30th birthday, he and two friends founded NVIDIA. Today, Huang often advises students to live a life of purpose, and to run, not walk, towards their goals.

36. What is the main idea of this passage?
- (A) How to come up with a speech
 - (B) How to succeed in chip making
 - (C) How to seize opportunities in AI
 - (D) How to deal with difficult situations
37. According to the passage, which is **NOT** an example of “**pushing oneself to do better**”?
- (A) Working for chip companies
 - (B) Reaching the age of 30 in 1993
 - (C) Earning two engineering degrees
 - (D) Founding NVIDIA with two friends
38. Based on the passage, arrange the following events in the order in which they happened.
- a. New products made profits when they were used for machine learning.
 - b. Huang's company almost shut down because of challenges in the industry.
 - c. Huang became one of the most 100 influential people in artificial intelligence.
 - d. The company admitted their mistake and obtained help to develop a product.
- (A) b → a → c → d
 - (B) b → d → a → c
 - (C) c → d → b → a
 - (D) c → a → d → b

On October 9, 2023, Triton, the first weather satellite made in Taiwan successfully entered space. It is also the fourth satellite in the world to use GNSS-R instrument to collect weather data. Its purpose is to help us predict the weather more accurately.

This satellite is named after Triton, an ancient Greek god of the sea. The sea god commands the wind and waves. The satellite Triton is able to gather such data as wave heights and sea wind speeds. Triton uses a technique that collects signals **reflected** from the Earth's surface. It carries GNSS-R instrument to receive signals which are sent back from sea surfaces. The calmer the sea, the stronger the signal, indicating weaker winds. This information is valuable as wind speed data is not easy to collect. Such information improves the prediction of typhoon strengths and movements. Triton observes weather changes mainly in the Atlantic Ocean, Indian Ocean, and central Pacific Ocean.

Triton, started in 2014, is the fruitful cooperation between Taiwan Space Agency (TASA) and local companies. TASA developed GNSS-R instrument and key components such as the Onboard Computer and GPS Receiver. More than 20 local research groups and manufacturers participated in developing the ground station equipment. The satellite is 82% developed and produced in Taiwan.

Now that Triton is in space, we can expect it to provide more accurate information and support disaster prevention. The success of Triton contributes to global weather forecasting. It is also an important step forward for Taiwan's space engineering.

Triton: 獵風者氣象衛星

TASA: Taiwan Space Agency 國家太空中心

GNSS-R: Global Navigation Satellite System-Reflectometry 全球導航衛星系統反射訊號接收儀

39. What is the passage mainly about?
(A) Challenges of space engineering in Taiwan
(B) The description of the Greek sea god Triton
(C) Differences in weather forecasting techniques
(D) The introduction of a weather satellite in Taiwan
40. Which is closest in meaning to “**reflected**” in the second paragraph?
(A) looked into (B) made of (C) sent back (D) named after
41. According to the passage, which of the following is true?
(A) Triton started to collect wind speed data before 2014.
(B) All of Triton was developed and produced in Taiwan.
(C) Triton shows the improvement in Taiwan's space skills.
(D) Fewer than 20 local companies worked on the Triton project.
42. Which of the following can be inferred from the passage about the contribution of Triton?
(A) It helps reduce damage caused by bad weather.
(B) It improves the speed and strength of typhoons.
(C) It connects the Atlantic Ocean and Indian Ocean.
(D) It measures the heights of satellites from sea surfaces.

二、非選擇題(第 I 題，每格 2 分，共 4 分；第 II 題 6 分；第 III 題 6 分；共 16 分)

I. 填充

說明：

- ▲ 請依據中文提示，將試題內空格 ①、② 答案之完整單字(含提示之字首)，分別作答於答案卷之作答欄 ①、② 之指定範圍內以完成句子。
- ▲ 請勿抄題，每格限填一字，超過一字者視為錯誤，不予計分。

1. 你比較喜歡用現金付款或是電子錢包？

Would you p ① to pay by cash or with an electronic w ② ?

II. 句子重組

說明：

- ▲ 請將題中 5 段提示字詞重組成一完整句子，並於句尾加上適當標點符號。
- ▲ 請將重組後的句子寫在答案卷之「非選擇題作答區」指定範圍內，答案中不能增減字詞或修改變化字詞，請勿抄題。

2. work on / to see that / It is good / solving pollution problems / more people

III. 中譯英

說明：

- ▲ 請將以下中文句子譯成正確、通順、達意的英文，並將答案寫在「非選擇題作答區」之指定範圍內，請勿抄題。

3. 一些專家說今年將比去年更熱更潮濕。
